ARUN JOJO

Senior DevOps Engineer

https://linkedin.com/arunkjojo | https://github.com/arunkjojo | https://arunkjojo.vercel.app
arunkjojo@gmail.com | +919400247717 | Ernakulam, Kerala, India

PROFESSIONAL SUMMARY

- **Core Engineering:** Over 5 years of experience architecting enterprise-grade, high-performance web applications using Next.js, React, TypeScript, and ASP.NET Core v9, backed by automated unit, integration, and E2E test suites.
- **DevOps & Infrastructure:** Strong foundation in containerization (Docker), orchestration (Kubernetes, Helm), CI/CD automation (GitHub Actions), and Infrastructure as Code (Terraform) across hybrid cloud (Azure/AWS).
- **Automation & Scripting:** Authored operations tooling and deployment automation, streamlining scheduled database maintenance and infrastructure provisioning while reducing manual deployment toil by 35%.
- **Database Engineering:** Designed and tuned relational schemas in PostgreSQL and MySQL with connection pooling and composite index optimization.
- **AI-Augmented Development:** Implemented developer tooling workflows (Claude Code, Cursor, Copilot) across engineering pipelines, accelerating feature scaffolding and test fixture generation to improve sprint velocity by 30%.

TECHNICAL SKILLS

- **DevOps & Infrastructure:** Docker, Kubernetes, Terraform, GitHub Actions, Linux Administration, Bash & Shell Scripting.
- **Front-End:** React.js, Next.js, TypeScript, Redux Toolkit, Tailwind CSS, PWA apps.
- **Backend & API:** Node.js, Express.js, ASP.NET Core Web API, Core PHP, RESTful API.
- **Databases:** PostgreSQL, MySQL.
- **Quality Assurance:** Unit Testing, Integration Testing, E2E Testing, Automated Pipeline Testing.
- **Scripting & Automation:** Python, Go, Bash/Shell Scripting, Git Workflows, Automation Script Development
- **AI Tool Assistance:** GitHub Copilot, Claude Code, Cursor AI, Codex, and Gemini.

PROFESSIONAL EXPERIENCE

Senior Software Engineer | **Gesher Technologies,** Ernakulam (Remote) **Aug 2026 - Present**

- Piloted containerized release automation with Helm and GitHub Actions, establishing canary/blue-green rollout patterns that increased weekly deployment frequency across core services.
- Engineered resilient RESTful microservices using ASP.NET Core v9 Web API and PostgreSQL, establishing dependency injection patterns, async request pipelines, and automated endpoint validation.
- Built full-stack web applications using Next.js (App Router, SSR, ISR), React, and TypeScript, implementing edge caching strategies to maintain sub-second First Contentful Paint.
- Established GitHub Actions CI/CD pipelines with embedded code quality checks, automated testing (unit, integration, E2E), and deployment gates to ensure code reliability and safety.

Independent Technical Upskilling | **Self-Employed** (Remote) **Oct 2025 - Jul 2026**

- Completed intensive professional tracks in Kubernetes and Cloud-Native Security (KCSA), DevOps engineering (KodeKloud).
- Explored advanced AI-assisted engineering workflows (Claude Code, GitHub Copilot) to evaluate developer velocity improvements for enterprise software development.

Senior Developer | **BCT Consulting & IKM,** Thiruvandapuram (Hybrid) **Jun 2024 - Aug 2025**

- Orchestrated release engineering and multi-environment deployment operations for public enterprise platforms (K-smart and K-suite, Information Kerala Mission), ensuring multi-tenant isolation and strict high availability.
- Automated staging and production deployment gates using GitHub Actions, embedding static code analysis and container vulnerability scanning to eliminate release regressions.
- Accelerated cross-functional engineering velocity by 25% by introducing AI-augmented code generation pipelines and standardized GitHub Copilot workflows across the team.

Full-Stack Developer | **Inlux Intelligence,** Kasaragod (Hybrid) **Oct 2022 - Jun 2024**

- Engineered robust backend services using Node.js/Express and PHP, redesigning relational schemas in PostgreSQL and MongoDB to reduce complex query latency by 40%.
- Streamlined trunk-based branching strategies, automated CI checks, and conducted rigorous pull request reviews, reducing release bugs in staging environments.
- Implemented real-time bidirectional communication layers via WebSockets, ensuring seamless synchronization under high connection concurrency.

Jr. React Developer | **2Hats Logic Solutions,** Ernakulam (Hybrid) **Apr 2022 - Sep 2022**

- Built and published cross-platform Progressive Web Apps (PWA) and Trusted Web Activities (TWA) with React, driving a 40% increase in mobile user retention.
- Maintained operational health and client monitoring for high-availability production apps, including real-time speech translation and e-commerce platforms.

React-PHP Developer | **Inlux Intelligence,** Kasaragod (Remote) **Jan 2020 - Mar 2022**

- Developed responsive web applications using React.js, PHP REST APIs, and MySQL; packaged and published production TWAs directly to the Google Play Store.
- Managed end-to-end delivery from wireframe implementation to Firebase deployment, maintaining 99.5% uptime across client systems.

EDUCATION

Bachelor of Science in Computer Science **2018 - 2021**

Kannur University, Kasaragod

- **Recognition & Awards:** Won "Best Coder" at ZEITGEIST from Kannur University.
- **Score**: 67.24%
- **Coursework**: Data Structures & Algorithms, Database Management Systems, Web Development, Operating Systems, Computer Networks, Software Engineering.
- **Projects**: helplineKerala (multi-tenant marketplace) - Developed by React.js and PHP-MySQL as Full-stack PWA web application.

CERTIFICATIONS

- Kubernetes and Cloud Native Security Associate (KCSA) – Microsoft *(Pursuing)*
- DevOps Engineer – KodeKloud
- Introduction to DevOps – IBM
- Claude Code in Action & Claude Agentic Skill & Claude on Google Cloud – Anthropic
- Claude Code: Software Engineering with Generative AI Agents – Vanderbilt University
- AI Infrastructure: Introduction to AI Hypercomputer – Google Cloud
- CI/CD DevOps with GitHub & GitHub Copilot
- ASP.NET Core 9 Web API & Back-End Development with .NET – Microsoft
